IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed including the following:

- Read and follow all instructions carefully.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they are under the supervision of a responsible person or have been given proper instruction in using the appliance. This appliance is not intended for use by children.
- Always be sure the Lid Vent is clear of all food debris before use. A clogged vent may cause steam and excess pressure to build up.
- Do not touch hot surfaces. Use pot holders or oven mitts.
- To protect against electric shock do not immerse or rinse cords or plugs in water or other liquids.
- Unplug from outlet when not in use and before cleaning. Allow to cool before handling components.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair, or adjustment.
- Do not use any attachments or utensils that were not recommended or supplied by the manufacturer. The use of attachments not recommended for use by the manufacturer may cause serious hazardous situations including personal injury.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, simply remove plug from wall outlet.
- Do not use appliance for anything other than its intended use.
- This appliance cooks using extreme heat and a small amount of pressure. Improper use may result in scalding injury. Make certain unit is properly closed before operating. See

THIS COOKER IS PERFECT...
For everyone who loves the ease and convenience of fast cooked gourmet meals made in one pot and portioned perfectly for one or two people.
You are about to discover why so many busy food lovers are switching to Perfect Cooker™... No more messy stove tops, hot kitchens or tedious clean ups. And it’s portable-just lock the lid, grab the handle and your meal is good to travel... easy to re-heat using any AC outlet.
For decades, our culinary design division has created some of the most useful and popular kitchen appliances for worldwide use.

Perfect Cooker™ is the latest in our distinguished line. We have tested and perfected the right combination of materials, cooking surfaces and electronic technology guaranteed to deliver perfect results every time.
The locked cooking chamber builds up heat while it seals in flavor and nutrition. The result ... meals cook faster and taste a whole lot better.
Perfect Cooker™ will provide you many years of delicious meals... but before you begin it is very important that you read this entire manual making certain that you are totally familiar with its operation and precautions.
A short power-supply cord is provided to reduce the risk resulting from becoming entangled in or tripping over a longer cord. Do not use an extension cord with this product.

If the electrical circuit is overloaded with other appliances, your appliance may not operate properly. It should be operated on a dedicated electrical circuit.

GETTING STARTED

Before using the Perfect Cooker™ for the first time, wash the Inner Pot (C), the Outer Lid (A) and the Inner Lid (B) with warm soapy water, a dish cloth or non abrasive sponge. To separate the Inner and Outer lids for cleaning, simply grasp the medium rubber gasket of the Inner Lid and pull out gently. Rinse all with clean water and dry thoroughly.

To insure proper operation, reassemble the Outer and Inner lids by aligning both Steam Vents (H&I) and push together gently until both lids are fully joined. Rinse and towel dry the Inner Pot. The Perfect Cooker™ is now ready for use.

General Operating Instructions

• Never load Inner Pot above the MAX line (see below). Rotate the Inner Pot to make certain that it is seated properly on the Heating Plate.
• Always be certain the Steam Vents are clear of any obstructions.
• Attach the AC Cord (E) to the Base Unit (D) then plug the AC Cord into a dedicated 120V wall outlet.
• Place ingredients in the Inner Pot as per the recipe. Place the Inner Pot into the Base Unit. Put on the Outer Lid (A). When properly placed the lid will not rotate. Secure lid with Lid Locks (J).

Note: The Perfect Cooker™ remains in Heat (cook) Mode until the unit reaches a predetermined internal temperature. Once that temperature is reached, the unit automatically switches to Keep Warm Mode preventing overcooking or burning. Follow the procedures and “cook times” shown in the recipe booklet until you become fully familiar with unit’s operation.

Inner Pot gets HOT after cooking. Be careful when removing. Always use silicone grips or pot holders.
CONTROL PANEL  ONE MAIN CONTROL SWITCH DOES IT ALL

1. Place the Inner Pot with ingredients into the Base Unit.
2. Cover and lock the Outer Lid in place.
3. Attach AC cord to Base Unit.
4. Plug into AC outlet.

When the unit is first plugged in, The Warm LED light will be illuminated. Push the Control Switch down, then the Cook LED will illuminate. When the cooking process is complete, the Cook LED will go out, the Control Switch will go to the off position, and the Warm LED will automatically come on. The Perfect Cooker™ will keep the food warm until you are ready to serve.

IMPORTANT:
When your food is ready to serve, unplug the AC power cord from the wall outlet. Using oven mitts or pot holders, unlock the Lid Locks and remove the Outer Lid. Using the Serving Spoon supplied with this unit, transfer the food to your plate or a serving dish. If you choose to remove the Inner Pot, be sure to handle it with oven mitts or pot holders to avoid possible injury from the Lid, Inner Pot or food.

SMART TECHNOLOGY
Monitors food to regulate cooking. Unit automatically goes into Keep Warm mode when programmed temperature is reached.

Food To Go!
Prepare meals to go with your Perfect Cooker™. Great for the office or anywhere that has a 120V electrical outlet. The locked lid keeps food warm... or simply plug in and re-heat when you’re ready to eat.

Note: Use caution when handling Lid and Inner Pot after heating.
CARE & CLEANING

TO CLEAN: After use, unplug unit and allow to cool completely before cleaning. The Perfect Cooker™ must be cleaned thoroughly after each use in order to prevent damage caused by a build-up of food or cooking residue.

Caution: Never immerse the Base Unit in water or any form of liquid.

Before cleaning the Base Unit, first make sure it is unplugged from the AC outlet. Using a soft, damp, dish cloth or sponge wipe the inside and outside surface using a mild soap. Never use abrasive cleaners of any kind on this unit.

For proper cleaning the Rubber Gasket should be removed. Using the Pull TAB located beneath the Lid, remove the Pot Lid Liner that holds the Gasket. After cleaning re-attach Gasket to Lid Liner and snap back in place.

To clean the Lid, grasp the medium rubber gasket of the Inner Lid then pull gently but firmly to separate it from the Outer Lid (as shown above). Wash both with warm soapy water, a dish cloth or non-abrasive sponge. Carefully check and clean the Steam Vents (pg.3 H & I) to remove any food or debris.

The Inner Pot should be cleaned using warm soapy water, a dish cloth or non-abrasive sponge. Do not place parts in a dishwasher. Dry all components thoroughly, re-assemble the unit and store it on the counter top or with your other kitchen appliances.

HELPFUL HINTS

• For best results, it is suggested that you do not use the WARM function for more than 5 hours.
• If the Cooker switches to WARM before the food is done, you will need to add more liquid.
• Foods that are overly sweet or oily can cause the Cooker to switch to WARM earlier than desired. If this happens, add some liquid.
• When baking in the Cooker, it is usually necessary to push COOK more than once. You will need to wait for about 5 minutes after the machine switches to WARM to be able to press it back to COOK. This is normal.
• The temperature of the WARM setting is 100-103 degrees. This is hot enough to cook foods and far too hot for any bacteria to grow or for food to spoil. It is very safe to keep foods at this setting for several hours.
• Do not double recipes in the Cooker. The tightly closed Lid will force excess hot liquid out of the steam vent. If this happens, unplug the unit and allow it to cool thoroughly before unlocking the lid to avoid possible injury.
MANUFACTURER’S LIMITED WARRANTY

The manufacturer warrants that your Perfect Cooker™ is free of defects in materials and workmanship and will, at its option, repair or replace any defective Perfect Cooker™ that is returned to it. All parts and components of the Perfect Cooker™ are warranted for 60 days from the original date of purchase. This warranty is valid only in accordance with the conditions set forth below:

1. Normal wear and tear are not covered by this warranty. This warranty applies to consumer use only, and is void when the product is used in a commercial or institutional setting.

2. The warranty extends only to the original consumer purchaser and is not transferable. In addition, proof of purchase must be demonstrated. This warranty is void if the product has been subject to accident, misuse, abuse, improper maintenance or repair, or unauthorized modification.

3. This limited warranty is the only written or express warranty given by the manufacturer. Any implied warranty of merchantability or fitness for a particular purpose on this product is limited in duration to the duration of this warranty. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

4. Repair or replacement of the product (or, if repair or replacement is not feasible, a refund of the purchase price) is the exclusive remedy of the consumer under this warranty. The manufacturer shall not be liable for any incidental or consequential damages for breach of this warranty or any implied warranty on this product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

5. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Procedure for Warranty Repairs or Replacement:

If warranty service is necessary, the original purchaser must pack the product securely and send it postage paid with a description of the defect, proof of purchase, and a check or money order for $9.99 to cover return postage and handling to the following address:

Perfect Cooker™, P.O. Box 3007, Wallingford, CT 06492.
In many of the following recipes, we have a technique for using the cook feature. Once you press the Cook button, the unit will heat up. When the unit has reached the allotted temperature, it will switch over to keep warm. At this point, there is still enough heat left to continue cooking the food inside. Then the Keep Warm setting is like a slower cooker and will continue cooking recipe.
